## PRESS RELEASE

### **Meritor Facility Earns Major Quality Award from Daimler Trucks North America**

The dress axle team at the York, S.C., United States facility received the prestigious 2012 Masters of Quality Supplier Award from Daimler Trucks North America (DTNA).

York has earned the award — Daimler Trucks' highest supplier recognition — for three of the past four years. Meritor is among 44 manufacturers from the United States, Canada and Mexico to receive the 2012 recognition.

The facility earned the recognition based on a defect rate of 2 parts per million (PPM) and zero delivery issues on its work for Daimler Trucks in 2012, which involved dressing and testing axles for Freightliner and Western Star truck brands.

Continuous improvement on the assembly lines and having a good working relationship with the Southeastern DTNA truck plants have led to year-over-year improvement in PPM and delivery, according to Scott Walters, York site manager. Meritor's value proposition to DTNA includes improved costs, processes and tooling.

"They select only a handful of suppliers with solid PPM and delivery for this award," Walters said. "This recognition also demonstrates how the team is focusing on Meritor's goals to improve cost, quality and delivery to our customers."

"DTNA as an important strategic customer that Scott and the York dress axle team have worked hard to satisfy," said Chad Mitts, general manager, North American Brakes and Drivelines. "The results of their work are reflected in this important award."
