FEATURES & BENEFITS

- Low friction bushings (Ezi Steer) help to reduce steering effort and provides longer life. Three grooves allow complete flushing action during lubrication.
- Double draw keys allow the king pin to be held more firmly in place, resulting in superior front end stability and longer life. The draw keys are threaded for easier service.
- Large diameter king pin provides greater durability and longer component life.
- King pin seal prevents lubricant seepage, seals out contaminants and provides improved lubrication system.
