

MERITOR® AIR DISC BRAKE ROTORS FOR THE AFTERMARKET

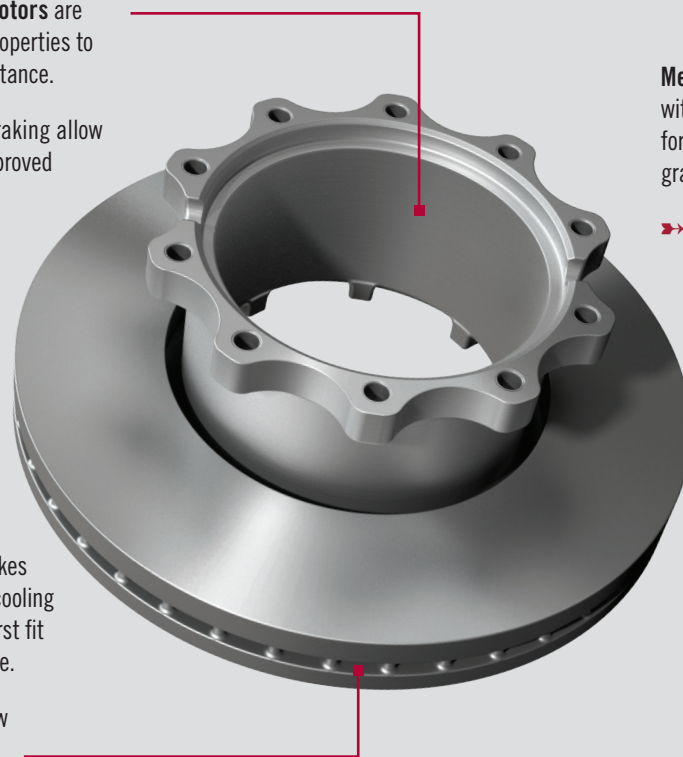

WE START WITH THE RIGHT STUFF AND STOP WITH IT TOO.

Meritor® Air Disc Brake (ADB) rotors are designed for enhanced thermal properties to extend life and improve fade resistance.

- Lower temperatures during braking allow for longer friction life and improved rotor durability.

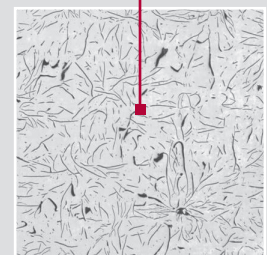

Meritor cooling vanes on all-makes aftermarket rotors use the same cooling vane design as Meritor Genuine first fit rotors that are specified for OE use.

- Cooling vanes promote air flow through the rotor and reduce overall rotor weight.

Meritor® ADB rotors are engineered with high quality cast iron. The formulation and process produces long graphite flakes which conduct heat.

- Better thermal dissipation provides lower peak temperatures for longer friction life.

U-SHAPED ROTOR

Meritor Part Number	Application	Vocation	Outside Disc	New Disc Thickness	Discard Thickness	Overall Rotor Depth
M44DK021958*	Bendix® SN7™	Linehaul / Vocational	16.9"	1.8"	1.5"	3.4"
