TECH TIPS

T2000 AIR DRYERS AND CARTRIDGES

1. Before servicing the air dryer relieve all system and purge tank air pressure
2. During installation lubricate o-ring and rubber gasket with the lubricant provided.

This will prevent premature failure and ease the removal of the seal.

3. Tighten cartridge ½ turn only after gasket contacts casting surface.

Over tightening can make removal difficult.

MERITOR IS OUT ON THE ROAD

Throughout the remainder of 2019, if you're passing along the **Hume Highway just north of Albury on the Victoria / New South Wales** border be sure to keep an eye out for the Meritor Billboard.

This stretch of road between Sydney and Melbourne is one of the busiest interstate roads in the country with around 3,500 commercial vehicles passing along it every day. We're putting the billboard out there to remind customers we're running with them every mile of the journey.

Each quarter we'll change the skin to a different theme emphasising the strengths of the Meritor products and brand. Each skin will have a catchphrase beginning "Run with....."

Your suggestions are also most welcome.
