PRODUCT IN FOCUS

MERITOR® AIR SUSPENSION HEIGHT CONTROL VALVES

Meritor Height Control Valves are the choice of fleets because of their proven performance and are engineered to be the most reliable valves on the road. Other aftermarket valves are not built to the same standards, do not meet the same specifications, and do not perform as well or last as long.

FEATURES & BENEFITS:

- Superior lubricants with proven and consistent lubrication to protect the valve
- Proven O-ring seal integrity throughout the life of the valve
- Other Aftermarket valves require frequent replacement due to excessive wear and tear
- Engineered to outlast all other levelling valves

WHY BUY TIPS X30 BRAKE DRUMS

The X30 competitive advantage is its exclusive one-piece roll-formed shell design combined with Meritor patented machine-to-balance process. This exclusive design and manufacturing process ensures that our exceptional X30 drums are light enough, strong enough and durable enough to deliver the higher payloads your business needs, while keeping maintenance at a minimum.

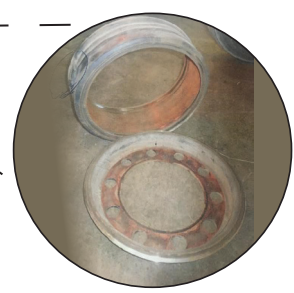

MERITOR X30

Part Number: 53-123537-002

COMPETITOR PRODUCT

Worst case scenario

Only X30 uses a single piece shell with machine to balance process

X30 FEATURES

- Exclusive Meritor Design
- One piece roll formed shell
- Patented machine to balance
- Up to 10kg per drum weight savings compared to standard full cast
- Typical payback of 2 to 3 months

X30 BENEFITS

- Delivers superior concentricity and better balance
- Best in class appearance with no weld seams or balance weights
- Increases payload capacity
- Improves fuel economy
- Reduces operational costs
