PRODUCT IN FOCUS MERITOR GLADHANDS

DID YOU KNOW?

Gladhands are coupling devices used to connect the service and emergency air lines from the truck or tractor to the trailer.

The couplers have a rubber seal which prevents air from escaping. To connect the gladhands, the driver presses the two seals together with the couplers at a 90° angle to each other.

A turn of the glad hand attached to the hose will join and lock the couplers.

Ordered in convenient and sturdy Meritor display buckets - when sold as 75 pieces.

TECH TIPS

MERITOR® DRIVER-CONTROLLED DIFFERENTIAL LOCK (DCDL) INTER-AXLE DIFFERENTIAL (IAD) LOCK

DRIVER-CONTROLLED DIFFERENTIAL LOCK (DCDL) INTER-AXLE DIFFERENTIAL (IAD) LOCK

Wheel Differential Function.

- Allows both wheel ends of an axle to receive equal torque from the driveline by "splitting" the torque between the two wheel ends
- Compensates for:
 - Speed difference between wheel ends that occurs when the vehicle is turning and the outside wheel rotates faster than the inside wheel
 - Tire mismatch
 - Uneven road conditions

Inter-Axle Differential Function.

- An inter-axle differential (IAD) works in a similar manner to the main differential except it splits the torque equally between the two axles of a tandem, rather than the two wheel ends of an axle.
- Allows for speed differences between the two axles of the tandem

WHY BUY WHEEL END BEARINGS

PREMIUM QUALITY BEARINGS FROM MERITOR, A NAME YOU KNOW AND TRUST.

Introducing Meritor premium bearings for optimum performance from a proven, steadfast source. You know Meritor for its longevity in the commercial vehicle market. Over 100 years of leadership in innovation, design and manufacturing means the best-quality products to meet your aftermarket replacement needs. Now you can depend on Meritor for all-makes premium tapered roller bearings for a cost-effective bearing solution. Designed for differentials, transmissions and wheel ends – including steer, drive and trailer axle applications – our comprehensive portfolio covers a wide range of bearing requirements.

- Manufactured using the same processes as Meritor production bearings
- Only high grade raw materials
- Less impurities for greater performance
- Through-hardening process for elevated tensile strength
- Precise internal geometry
 - Tighter accuracy and performance
- Traceability
 - Ability to trace a part from raw materials through production ensures product integrity

EMPLOYEE PROFILE

AMANDA KELLY

ROLE AT MERITOR: Payroll Administrator

YEAR JOINED MERITOR: 2012

1. WHAT IS YOUR BACKGROUND?

Believe it or not but I use to be a Personal Trainer. After I decided that wasn't what I wanted, I moved into Accounts and finally into Payroll.

2. TELL US A LITTLE BIT ABOUT YOUR MAIN JOB RESPONSIBILITIES.

Ensuring payroll is done in a timely and efficient manner. Maintaining the payroll system. Answering all payroll related queries. Also assist with Invoicing.

3. WHAT DO YOU ENJOY MOST ABOUT YOUR ROLE?

I enjoy that I deal with every single person in this company Australia wide. My role isn't just limited to one or two departments.

4. WHAT IS YOUR BIGGEST CHALLENGE IN YOUR NEW ROLE AS PAYROLL ADMIN ?

Co-ordinating the priorities of an improved payroll function and budget constraints. And getting timesheets in on time!

5. WHAT ARE YOUR INTERESTS OUTSIDE WORK?

I enjoy catching up with friends and family, riding my Harley, travelling when I can and renovating my home.
