## New Year, New and Improved Visual Search Functionality for 145 Drive Axle and Suspension

To start off the new year, we are pleased to introduce two recent enhancements within the [Visual Search](#) tool. Using the interactive exploded parts views in [Visual Search](#) is one of the many ways you can quickly and easily find the parts information you need on [MeritorPartsXpress.com](#). We have updated the 145 drive axle content in [Visual Search](#) so you can now access the full functionality of the tool, which includes List View, Exploded View and more. See below for a quick step-by-step on how to find the new information:

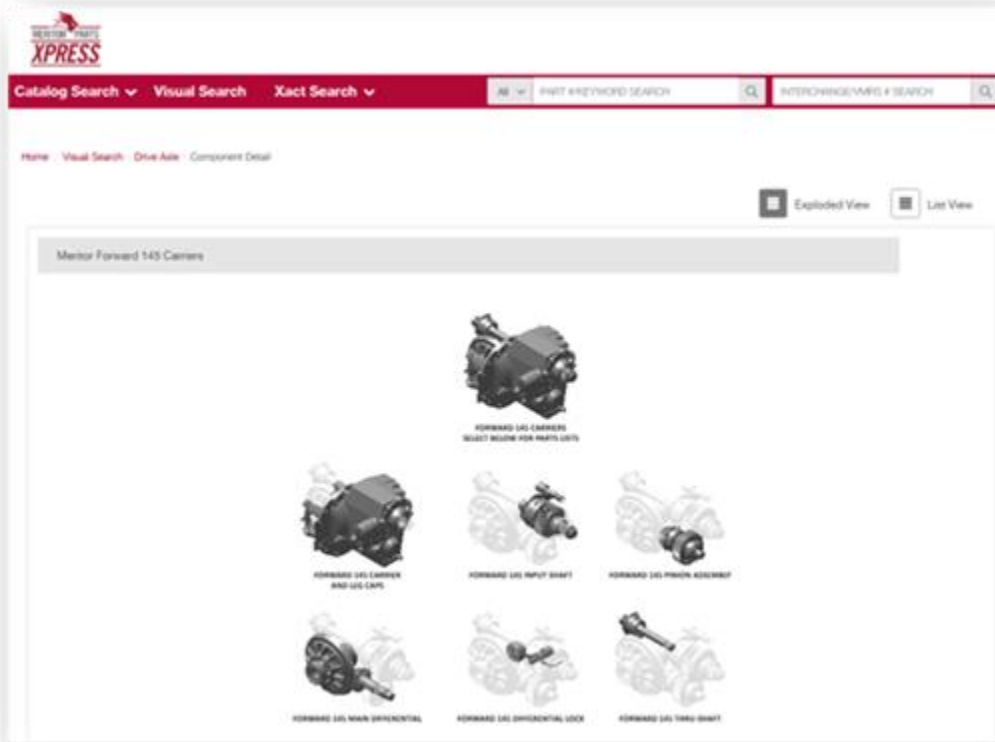

Select [Visual Search](#) from the top menu on **MeritorPartsXpress**. Hover or click on the rear axle area of the truck and select Drive Axle.

Select Meritor as the 'Manufacturer'. You will then see all of the available models, including the 3 most recently added models below.

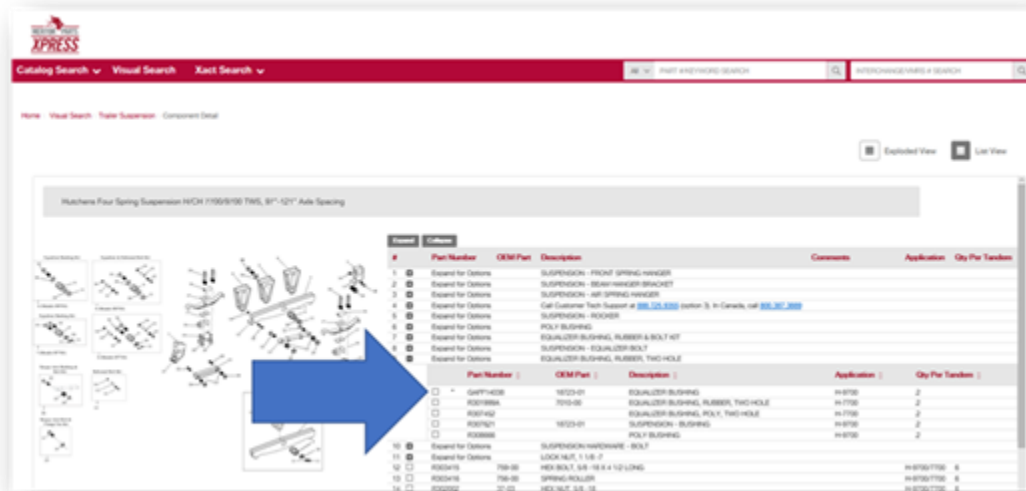

Select Model
<input type="radio"/> Meritor Forward 145 Carriers
<input type="radio"/> Meritor Single/Rear 145 Amboid Carriers
<input type="radio"/> Meritor Single/Rear 145 Hypoid Carriers

Then, by selecting the area of the carrier to view the component detail, you are one step closer to finding the exact 145 drive axle part you need!

Part numbers for GAFF polyurethane components are also now showing within [Visual Search](#) for suspension. From the main [Visual Search](#) page, select a suspension area of the truck. Then, select the 'Model', 'Manufacturer' and

'Brand' to see the exploded parts view results. To view a list of part numbers, simply select the List View option. Under the Part Number column, you can then expand to see the part number options available.

The [Visual Search](#) tool is available on [MeritorPartsXpress.com](#) for both logged-in and non-logged in users. In addition to drive axle and suspension, you can use [Visual Search](#) exploded parts views to find the parts you need for a variety of assemblies within the truck and trailer, including brake and driveline. To find the exact parts you need using [Visual Search](#), visit [MeritorPartsXpress.com](#) today!

## Introducing New 'Can Build?' Messaging.

As of last month, [MeritorPartsXpress.com](https://MeritorPartsXpress.com) users have the option to determine inventory availability. A 'Can Build?' link is now visible on any out-of-stock kit part numbers build in our Florence, KY facility. Upon selection, you will see a **Can build** message when the components required to build (1) kit are in stock and the kit can be built. Alternatively, if not enough components are available to build the kit, you will see an **Insufficient quantity** message. New 'Can Build?' messaging is available for both logged-in and non logged-in users.
