Air Disc Brake Pad Identification Using the Visual Product Tool

Do you know about the **Visual Product Tool** within the catalog search on [MeritorPartsXpress](#)? The Visual Product Tool provides images, key dimensions and filters to quickly identify the proper replacement part. This feature is available for a variety of products such as [air disc brake](#) pads.

To access the Visual Product Tool, you will start with a Catalog Search on the top left of the navigation menu.

Select Air Disc Brake for the product lines listed to open the mega menu and then select [Disc Pads](#). You will then be able to view pad drawings with dimensions and retainer bar images from our portfolio.

Home > Catalog Search > Air Disc Brake > Disc Pads

Disc Pads

Finding the right part just got easier. Our Visual Product Tool provides images, key dimensions and filters to quickly identify the proper replacement part. To start, select the image, or name of image, and your selections will narrow. From the selection table, site users can filter, compare or view the part detail page.

For fast access to air disc brake product tools and resources including sales and technical publications, maintenance manuals, catalogs, videos, training modules and more, visit [Xpress Facts Air Disc Brake](#) product page.

The visual allows you to match the pad you have with the replacement you need. Once you select your pad, you will see a list of part numbers offered for that disc pad. You can use the filter and sort feature to drill down to find the exact part that you need based on fit, form and function. You can even use the selection boxes next to the part number to compare multiple parts. Simply select the "Add to Compare" or "Add to

BOM Compare" below the table.

Click on part number to view additional information on transit time.
