## How to Quickly and Easily Find Replacement Trailer Axle Components

Take the guesswork out of finding the right trailer axle component for your vehicle. With our latest addition to **Xact Search** on [MeritorPartsXpress](#), you can narrow down your search for trailer axle components including brake drums, hardware kits, lined shoe kits, wheel seals, wheel bearings and hubs with just a few clicks. Below is a quick step-by-step example of how to use the [Trailer Axle Components selector tool](#) to find the Xact parts you need.

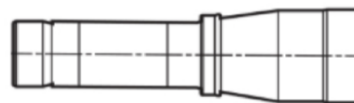

### Step 1: Select Your Trailer Axle Spindle Style

Graphics help you make a selection between a tapered spindle or straight spindle.

**Tapered**  
Meritor TN/TQ,  
Hendrickson HN, Dana D22

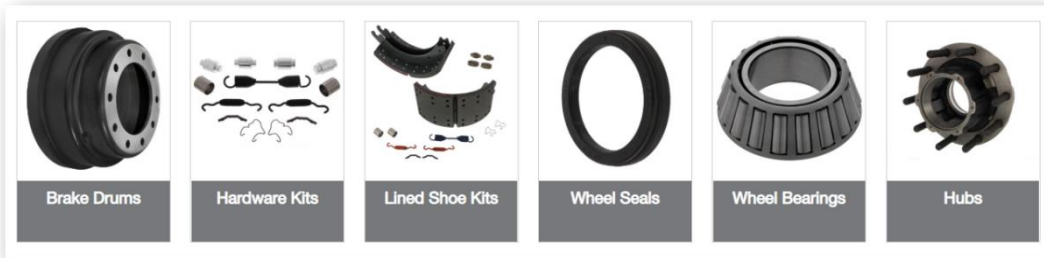

**Straight**  
Meritor TP or WP,  
Hendrickson HP, ProPar

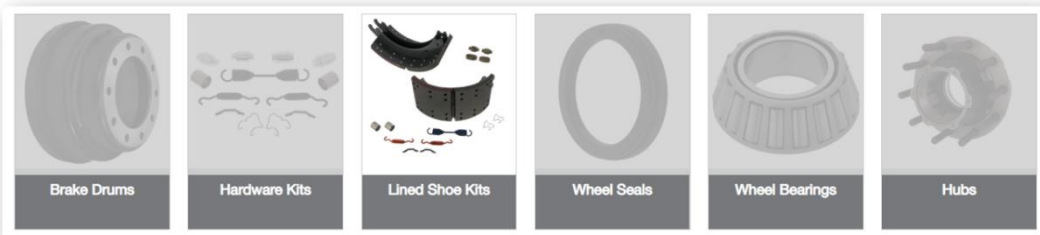

## Step 2: Select Component Category

Users have six component category options: Brake Drums, Hardware Kits, Lined Shoe Kits, Wheel Seals, Wheel Bearings and Hubs. Simply select the image for the component you need.

## Steps 3 & 4: Provide Brake Dimensions

If you selected Brake Drums, Hardware Kits, or Lined Shoe Kits in Step 2, you will then be prompted to select your brake dimensions. If you do not know the dimensions of your brake shoe, a graphic provides a guide for how to determine the diameter and width.

Diameter (inches) 16.5

Width (inches) 7

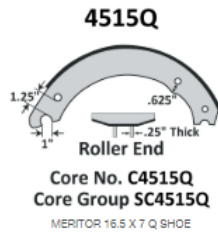

If you selected Hardware Kits or Lined Shoe Kits as your component category, you will then need to identify the brake style:

### Final Step: Select the Part Number You Need

Your search results will appear on a new screen. To take action, select the check box in front of the part number (i.e. Add to Cart, Add to Compare, etc.). If more than one part number is shown, simply filter or sort your options to refine your search.
