## Newly Improved Cross Reference Upload Functionality.

We are pleased to announce the launch of newly improved cross reference upload functionality for registered users on [MeritorPartsXpress.com](https://MeritorPartsXpress.com). Once signed into your account, a link for this new feature can be found on the homepage. The cross reference upload tool offers multiple ways for customers to easily find Meritor part numbers based on competitor part numbers. Customers can directly copy and paste part numbers from a list, drag and drop a file or upload a file from their computer/device. The tool will accept various file types including .txt, .csv, .xls, or .xlsx formats with one column.

The image shows two side-by-side panels for uploading part numbers. The left panel is titled "Enter the part number(s):" and includes a note: "Note: You can copy and paste parts directly below". It features a table with 10 rows, each with a number (1-10) in the first column and a text input field in the second column. The header of the table is "Part Number". Below the table is a red "+ Add More" button. The right panel is titled "Upload your file below. After adding your file click Submit." and includes a note: "Note: Upload file can be .txt, .csv, .xls, or .xlsx file formats with one column. Upload files are limited to 200 part numbers." It features a large cloud icon with an upward arrow, the text "Drag and drop your file here" and "or select a file to upload", and a "Choose File" button next to a text field that says "No file chosen". Between the two panels is the word "OR". Below both panels are "Submit" and "Clear" buttons.

Once the competitor part numbers are uploaded, the list of Meritor cross-reference numbers will be provided, plus additional key product details such as part description, brand, availability (in-stock or out-of-stock messaging), and pricing and ordering based on user ID permission settings.

This updated functionality is just one of the many powerful self-service tools that helps make it easy for customers to find the Meritor part information they need and boost their parts operations. For more information about the features and functionality on [MeritorPartsXpress.com](https://MeritorPartsXpress.com) available with and without a user ID, visit our [Site Benefits](#) page today!
